

Dear Pierre-Marc,

My name is François and I am first-year digital science student at ENSEEIHT.

I have always been attracted by scientific logic, therefore I have regularly participated in several math and computing competitions. This predilection is one of the main reasons that I have been attracted by space and all the unsolved questions about it.

As prospective engineer, I will have the opportunity one day to become a commercial engineer like you and to work abroad. I will need your own experience to answer questions that go through my head.

I really hope that you will give a positive answer to my requests and I make myself available for you to find a window that corresponds best to our both schedule.

Sincerely,

François Lauriol-Frisque
