Job

Job details

(main mission, daily tasks, etc)

- to develop the company's client portfolio
- to understand international market practices and to transcribe them in functional requirements for the development teams
- to meet the clients
- to negotiate sales contracts

Meeting conclusion

(personal insights, action plan, etc)

I think that I'm now interesting becoming a commercial engineer but I am still considering an aerospace engineering career. And I think that I will follow the advice of Pierre-Marc to see for an internship in an aerospace company of Labège's industrial zone.
